to the paper

Reconstructing the paleoenvironment of Loltún Cave, Yucatán, México,
with Pleistocene amphibians and reptiles and their
paleobiogeographic implications

by

José Alberto Cruz, Joaquín Arroyo-Cabrales, Víctor Hugo Reynoso

published in

Revista Mexicana de Ciencias Geológicas, 2016, 33(3), p. 342-354.

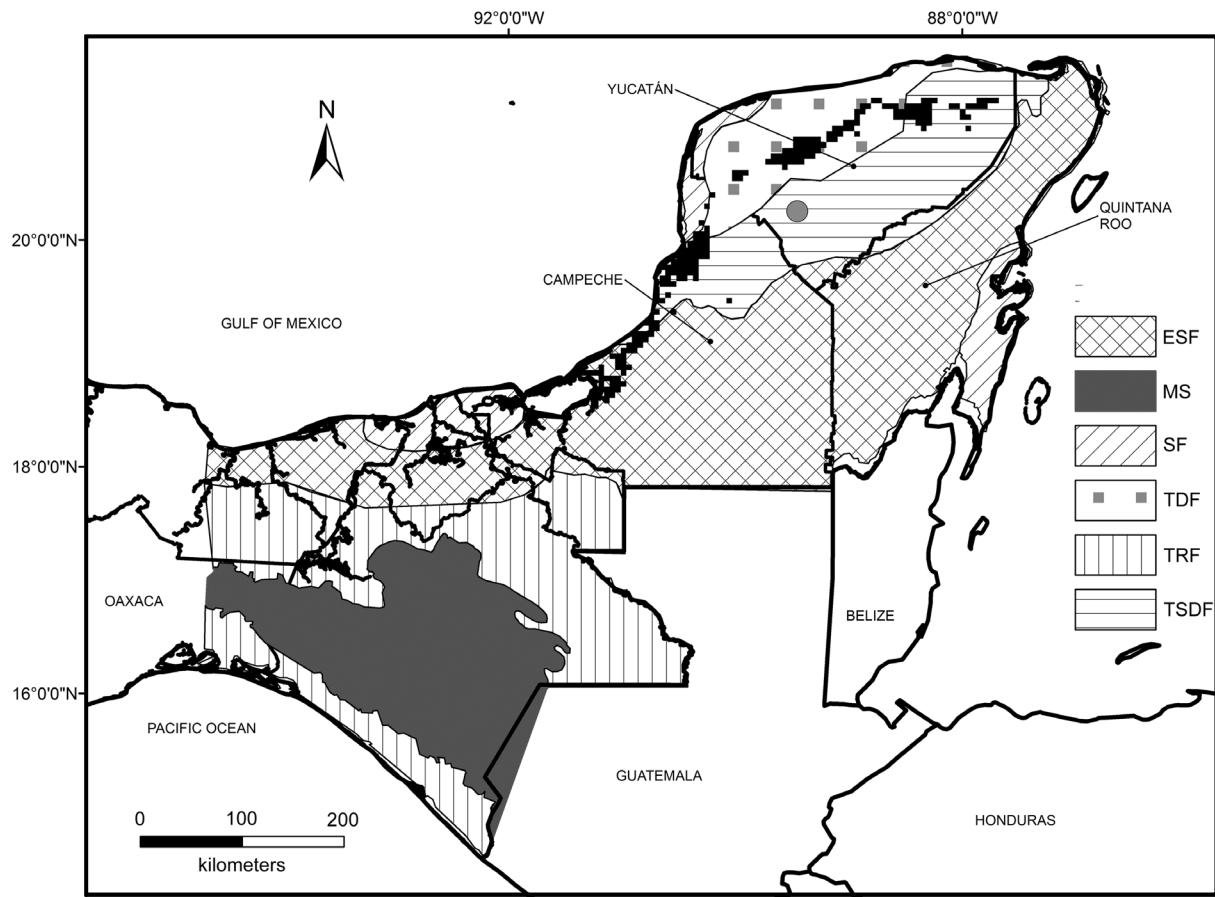

Figure S1. Overlapping area (black area) inhabited by the species of amphibians and reptiles from Loltún cave. Values of the area are 1 and 11 from Table S1 (see the second file of this supplement).
